

Local Revenue Measures November 2004

This November, voters in California considered more than 270 local measures¹ related to local agency taxes, fees and financing. One-hundred eighteen (118) of these measures concerned city taxes, fees or financing. Twenty-six (26) concerned counties and thirty-three (33) concerned special districts. There were more than eighty school measures including 55% school bonds and 2/3 vote special taxes. Among the city measures, thirty four (34) were special taxes or bonds requiring 2/3 voter approval and seventy-three (73) concerned general taxes requiring majority voter approval.²

Observations

1. The variety of unique local conditions makes drawing trends and generalizations difficult. There are many circumstances that can have bearing on the outcome of a local measure. These vary among localities and include:
 - a. The effect of spurious issues and personalities in the community. Have members of the city council or county board received bad press? Is there a contentious development issue?
 - b. Local fiscal conditions and levels of service vary. Voters may perceive that the city (or county) has plenty of revenue or that levels of service are sufficient.
 - c. Political leaning. Regardless of actual local conditions, populations in different localities differ in their basic philosophies of government.
 - d. Local activism. The presence or lack of activist citizens to support or oppose a local measure can have a major effect.
 - e. Clear and competent communication from the city/county. Short of advocacy, voters need basic information to make a decision.
2. There are winners and losers in virtually every category of tax measure. Results in all categories in November 2004 were mixed.
3. Generally, earmarking a tax for a special purpose (e.g. police, fire, EMS, libraries, parks, etc.) is not worth the 2/3 vote requirement needed to pass a special tax.
4. A/B strategies where a majority vote measure is pared with an advisory measure as to use of funds do not appear to be worthwhile.
5. Voters are much more amenable to continuing an existing tax than raising a tax.
6. All citizen initiatives to repeal or limit taxes all failed.

Transient Occupancy (Hotel/Motel) Taxes

Residents of twenty cities and four counties faced proposals to increase Hotel Taxes (Transient Occupancy Taxes) in their jurisdictions. Nineteen of the twenty cities proposed these increases as general taxes, requiring majority voter approval. One of these nineteen (Cathedral City) added a separate advisory measure setting aside a portion of the increased revenue for tourism. One of these cities, Palm Dessert, merely ratified a TOT increase that had been adopted in the 1990s by the city council when the voter approval requirements of Proposition 62 were in dispute.

The City of South San Francisco TOT increase proposal restricted the revenues for “parks, recreation and public safety services” and this required 2/3 voter approval.

¹ Includes city, county, special district and local school measures.

² In addition, there were six advisory measures requiring majority approval and five citizen referenda to repeal or restrict local taxes.

Among the twenty-two measures requiring a majority vote, eleven passed and eleven failed. Among the two special taxes, one passed and one failed.

Business License Taxes

Twelve cities placed Business License Tax increase proposals on their ballots. In all but two cities, the increases were for general purposes and required a majority vote. The city of South San Francisco proposal was to extend its business license tax to billboards and to restrict the use of the increased revenue to “parks, libraries and public safety.” This use restriction made the tax a special tax, requiring 2/3 voter approval. The measure

failed with a 65.3% “yes” vote. Oakland’s tax on parking lots to fund public safety programs passed with nearly 70% approval. In other cities, the results were mixed with five measures passing and five failing.

Utility User Taxes

Seventeen cities faced utility user tax measures. All proposals were for general purpose taxes and required majority voter approval. Voters approved six measures to continue existing taxes. All six proposals in three cities to increase existing UUTs failed. All seven proposals for new utility user taxes failed.

Transaction and Use Taxes: Countywide Transportation Sales Tax Measures

There were ten transportation sales tax measures on the ballot. Half extended existing taxes and half were to increase sales taxes. The five continuation proposals passed, all half cent measures. Voters in Marin and Sonoma approved new taxes. Sonoma County’s proposal, the only ¼ cent measure, passed by just a few hundred votes. Voters in Santa Cruz apparently were persuaded by local environmental groups that argued the plan dedicated too much money to highway widening.

Countywide Transportation Sales Tax Measures (2/3 voter approval required)

Transaction and Use Taxes: Countywide Special Tax Measures

There were six county measures to increase sales taxes countywide for special purposes other than transportation. Three were for public libraries (Fresno, Del Norte and San Luis Obispo), one for the Fresno County zoo, one for open space in Ventura County, and Law Enforcement in Los Angeles County. Of the library proposals, only the proposal to continue an existing 1/8 cent tax in Fresno county succeeded. New taxes for libraries in Del Norte (1/8 cent) and San Luis Obispo (1/4 cent) failed. In fact, of the six measures, all failed except the two in Fresno County. Fresno County voters approved a proposal for a new 1/10 cent sales tax for the County Zoo. Six in ten voters approved Los Angeles County Sheriff Baca’s long effort to pass a tax increase for law enforcement including additional city and county officers, crime prevention programs, and upgraded emergency communications systems, but the special tax measure fell short of 2/3 voter approval needed.

Transaction and Use Taxes: General Tax Measures

Recent changes in the law (SB566 2003) permit a city or county to place a local transactions and use tax proposal before the voters with a 2/3 vote of the governing board of the agency. In concert with Article XIII of the State Constitution, a general tax proposal requires majority voter approval. A special tax (earmarked for a particular purpose) requires 2/3 voter approval.

Voters in twenty two cities and five counties considered proposals to increase sales taxes for general purposes. Among the twenty-two city measures, two cities (Lakeport and Watsonville) placed companion advisory measures on the ballot requesting voter advice on the use of the funds. Of the twenty two measures, ten passed. Of the five county measures, only Del Norte voters approved its measure.

Transaction and Use Taxes: City Special Tax Measures

Seven cities decided propose sales tax increases for specific purposes, including five for public safety (police and/or fire) services. Three of the five public safety special taxes achieved the needed 2/3 vote. In Merced and Ukiah, the measures failed despite more than six of ten voters saying “yes,” suggesting that these measures might have passed had they been proposed as majority vote general taxes.

Municipal Service (Parcel) Taxes

Municipal service taxes, often called “parcel taxes” were on the ballot in fifteen cities. Each required 2/3 voter approval. Overall, seven of the fifteen achieved the 2/3 voter approval needed, including three of eight police/fire/EMS taxes. Taxes for libraries in Sacramento and San Jose passed, while one in Berkeley failed. A municipal service tax in the wealthy community of Piedmont passed, even as one in wealthy Atherton failed.

Parcel tax proposals by special districts fared worse. Only three of seventeen fire district proposals achieved the 2/3 voter approval needed. Although both library district parcel taxes passed, only one of six park district parcel taxes passed. Al in all, just eight of thirty special district parcel taxes succeeded in garnering 2/3 voter approval.

Citizen Initiatives to Repeal or Limit Local Taxes

The November 2004 ballot included six citizen sponsored initiatives in five cities that would repeal or limit local taxes. All failed to garner the majority vote needed for passage.

<u>Agency Name</u>	<u>County</u>	<u>Measure Name</u>	<u>Title</u>	<u>YES%</u>	<u>NO%</u>
